Committee & Organisation

General IEEE Conference Chairs:

- Laure MOREL, Université de Lorraine-ENSGSI, France
- Mauricio CAMARGO, Université de Lorraine-ERPI, France
- Laurent DUPONT, Université de Lorraine-ERPI, France

IEEE Conference Co-chairs:

- Yacine REZGUI, Cardiff University, UK (organizer of ICE 2021)
- Thomas BEACH, Cardiff University, UK (organizer of ICE 2021)
- Leon PRETORIUS, University of Pretoria, SA (organizer of IAMOT 2021)
- Tarek KHALIL, Nile University, Egypt (organizer of IAMOT 2021)
- James FLECK, The University of Edinburgh, UK (organizer of ICE 2023)

IEEE Conference Review Chairs:

- Marc PALLOT, Nottingham University Business School, UK
- Giovanny ARBELAEZ, Université de Lorraine-ERPI, France

IEEE Representative

- Robert E. Bierwolf, IEEE TEMS and CeTIM, The Netherlands (IEEE Officer)

Local IEEE Conference organizing committee:

- Fabio CRUZ SANCHEZ, Université de Lorraine-ERPI, France
- Alex GABRIEL, Université de Lorraine-ERPI, France
- Manon ENJOLRAS, Université de Lorraine-ERPI, France
- Fedoua KASMI, Université de Lorraine-ERPI, France

General NITIM Chairs :

- Roland ORTT, TU Delft University, NE
- Stefan KLEIN, Munster University, DE

Local PhD commitee:

- Diana Cardenas, Université de Lorraine-ERPI, France
- Valentine Labouheure, Université de Lorraine-ERPI, France
- Fanny Pruvot, Université de Lorraine-ERPI, France
- Guillaume Pronost, Université de Lorraine-ERPI, France

Venue: Convention Center, Centre Prouvé

Centre Prouvé – corridors

Main Entrance

Registration Desk

Access to 1st Floor

Foyer 850 – Booths, posters, Coffee, lunches

Access to 2nd Floor

Open space between session rooms

Centre Prouvé – Auditorium 300

Wednesday 22nd June

Centre Prouvé – WS rooms

8 “small” rooms
with max. 80
participants
(103, 104, 105,
106, 202, 203,
204, 205)

Or 2 merged
rooms with max.
160 participants
(103 & 104, 105 &
106)
And 4 rooms (202,
203, 204, 205)

Rooms 105, 106 can be merged

Rooms 103, 104 can be merged

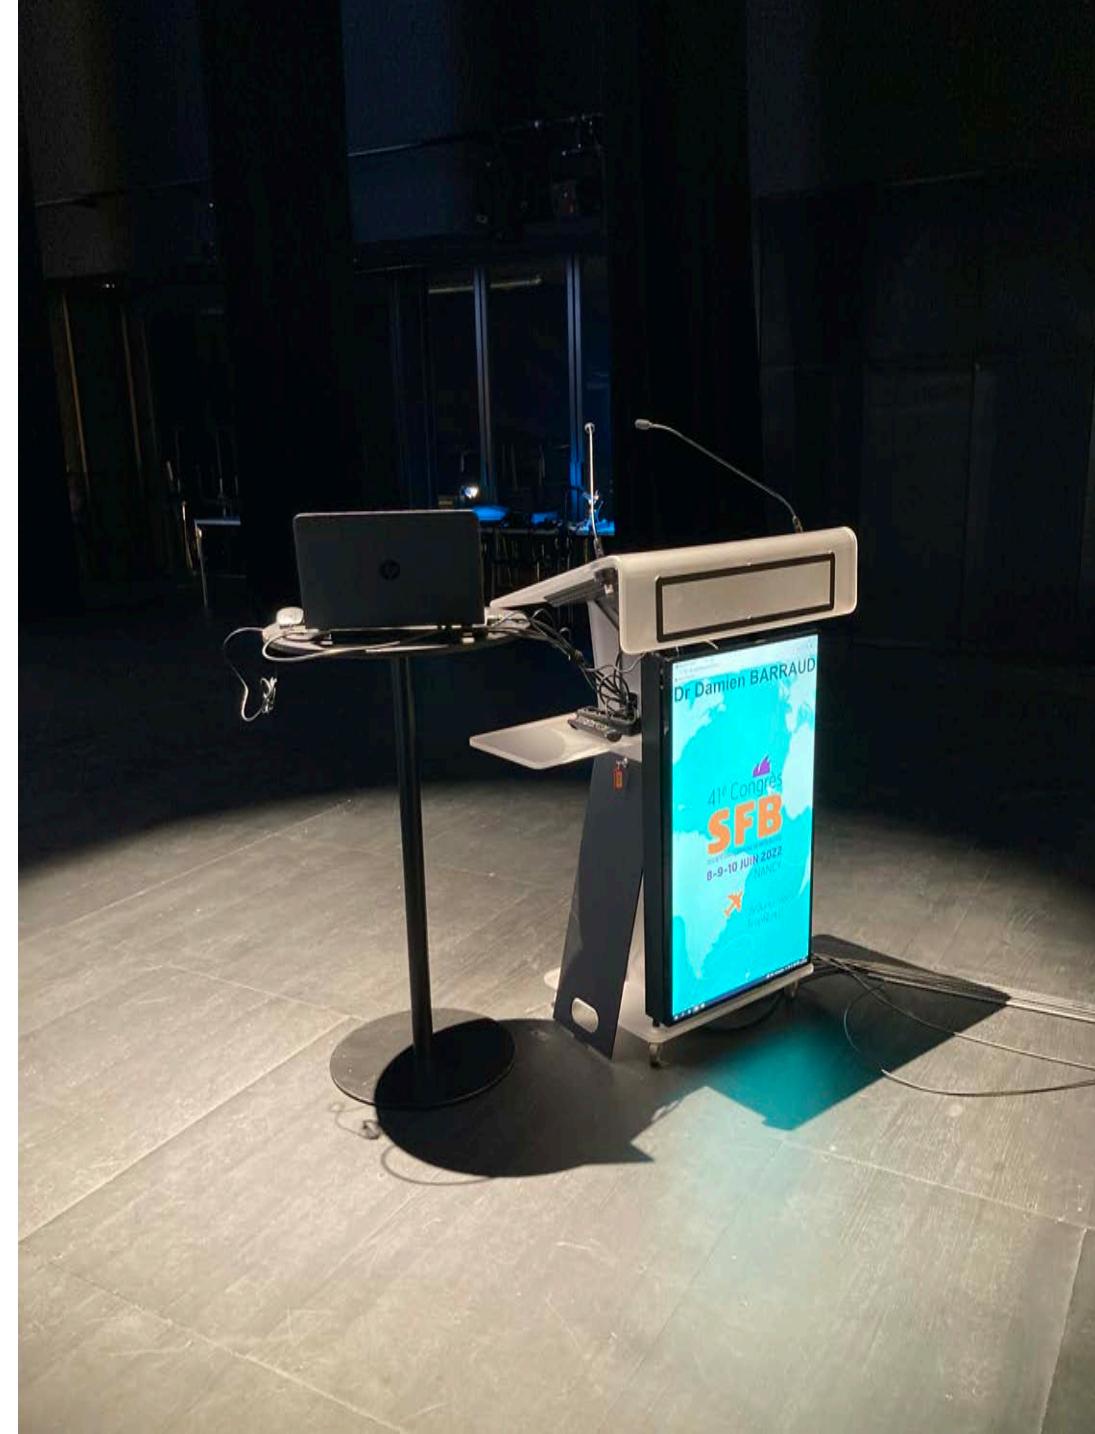

Centre Prouvé – Lunchs

Monday – Tuesday

Wednesday

Keynote speaker - Monday 20 June

Ahmed Osman

Dr. Osman is a Principal Technical Advisor at Pacific Northwest National Laboratory (PNNL), a national research laboratory operated by the Department of Energy, USA. Prior to PNNL, he served at Siemens for about 28 years assuming various technical and leadership positions.

President of IAMOT

“Digitalization, De-carbonization, and Innovation”- What we need for a Sustainable Planet

Keynote speaker - *Monday 20 June*

Dominique Jolly

Dominique Jolly is an independent advisor on foreign business with China. He works as a consultant for several large companies. He also advises international organizations and foreign governments in the areas of innovation and technology.

His assignments have taken him to over twenty countries in Europe, Asia, North America, South America and Africa. He was previously Professor of Business Strategy. He worked for Webster University Geneva (Switzerland), SKEMA Business School (Sophia-Antipolis, France), the Center on China Innovation at CEIBS (Shanghai, China), HEC Montréal (Montréal, Canada) and Grenoble Ecole de Management (Grenoble, France).

China's Rapid Technological Transformation: Good news for Ecological Transition?

Keynote speaker - Monday 20 June - 13:30

Alice de Casanove

Dr. De Casanove is Director of Culture Evolution & intrapreneurship . She is in charge of innovation competencies and learning in Airbus Defence and space. Washington D.C.

She plays a pivoting role in the publication of the ISO referential on good practices in innovation management (ISO 56000 series). Between 2013 and 2022, she was the ISO chair of the international standardisation committee on Innovation Management gathering 50+ countries in close coordination with WTO, OECD, WIPO and World Bank.

She is an Associated Researcher at the ERPI Lab

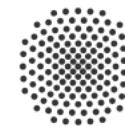

Return of experience regarding Innovation management ISO 56000 series: Implementation in a large organization

Keynote speaker - *Tuesday 21 June – 8:30*

Alex Brem

Prof. Dr. Alexander Brem
Institute of Entrepreneurship and Innovation Science
Chair of Entrepreneurship in Technology and Digitization,
endowed by the Daimler Fund in the Stifterverband

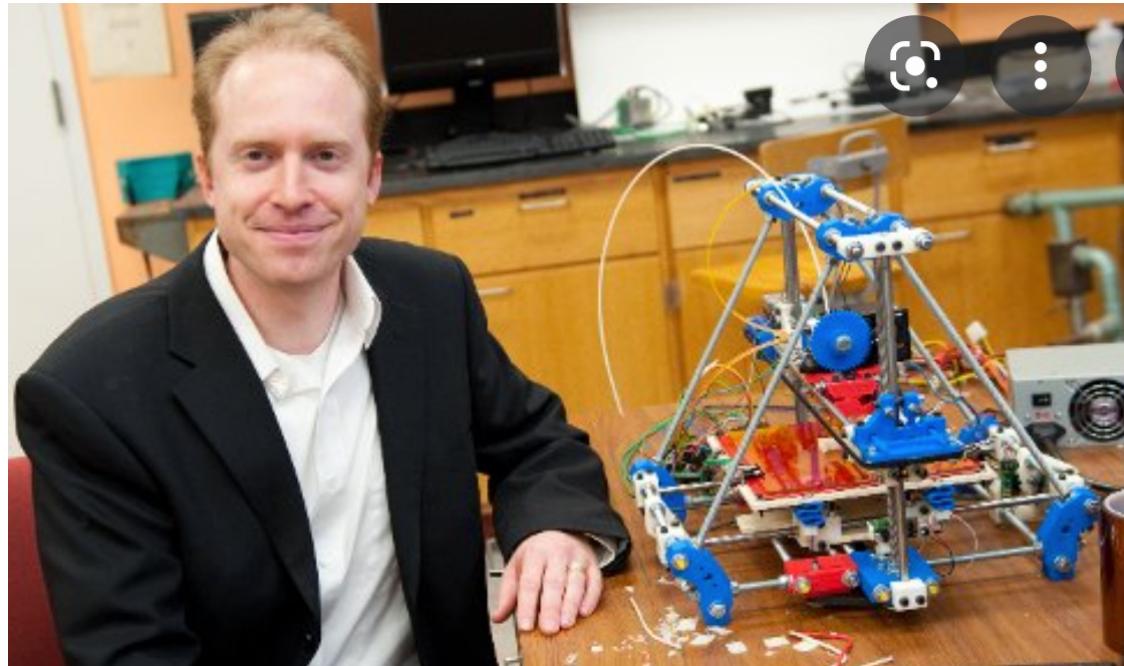

University of Stuttgart

**Frugal Innovation:
Constraint-based thinking as a solution for sustainability?**

Keynote speaker - *Tuesday 21 June – 13:00*

Joshua M. Pearce

Dr. Pearce is the John M. Thompson Chair in Information Technology and Innovation at the Thompson Centre for Engineering Leadership & Innovation
Director of the Free Appropriate Sustainability Technology (FAST) Lab

Prof@Lorraine, Permanent visiting professor at the ERPI Lab

**Open source appropriate technology (OSAT) :
Finding collaborative solutions to problems in sustainability and poverty reduction**

Round table: Innovation in public Administration

Tuesday 21 June – 14:30 – 16:00 - Auditorium

Chair: Prof. Vincent Boly [IAMOT] – Fedoua Kasmi [UL-ERPI & RNI]

- **Laurent Watrin:** Deputy Mayor in charge of cooperative democracy, public policy innovation and the digital city at City of Nancy
- **Séverine Husson:** In charge of the ecological transition at City of Nancy
- **Mitra Tehranchi:** Project Manager – Noremat (SME)
- **SDIS 57** – Departmental Fire and Emergency Service
- **Prof. Vincent Boly, Dr. Manon Enjolras:** Tool - innovative capacity of municipalities (UL, ERPI Lab)

Company-Community Collaboration for Open Source Development of products and services	OPEN_NEXT	869984	✓

Shared challenges

INEDIT
open INnovation Ecosystems
for Do It Together process

<https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/opportunities/topic-details/dt-fof-05-2019>

- The transfer to industrial companies of the Do It Yourself (DIY), fablabs, micro-factories and makers approaches can pioneer ways towards engineering solutions throughout the whole value chain. These innovative methods can lead to new processes, machines and products with new functionalities and shorter time to market.
- Industry is not yet widely using such innovative approaches to engage consumers and respond to societal needs, also taking into account the individual preferences of women and men. Collaborative production liaising companies, especially SMEs, with these new approaches can however create Open Innovation networks that can unroll a wide range of entirely new business opportunities for the benefit of consumers.
- *The purpose of this call is to transform European industry through the integration of digitisation and other enabling technologies and achieve global industrial leadership. Success will be seen in global industrial leadership, notably in manufacturing, and in opportunities for re-industrialisation.*

Four different complementary projects

		 IN EDIT open INnovation Ecosystems for Do It Together process		 OPEN! TRANSFORMING COLLABORATIVE PRODUCT CREATION
Demonstrator(s)	2 MDFs (Fablabs) + Digital platform; 2 rounds of OIPs with 6 SMEs	4 OMDF (Innovation Hub supported by a SME & a Big company; 3D printing with wood ; 3D printing & moulding with recycled plastic ; smartification) + Digital platform for Co-creation (website + Apps + ERP + SDO	6 (5) CMDF + 19 Use cases (co-creation ventures) + several open innovation missions. Digital platform for co-creation	6 pilot + 12 demonstrator SME cases (OS hardware projects with makerspaces providing facilitation support for co-creation); one co-creation and one metadatabase for linked open hardware

Wed. 22nd June 14:00 – 18:00

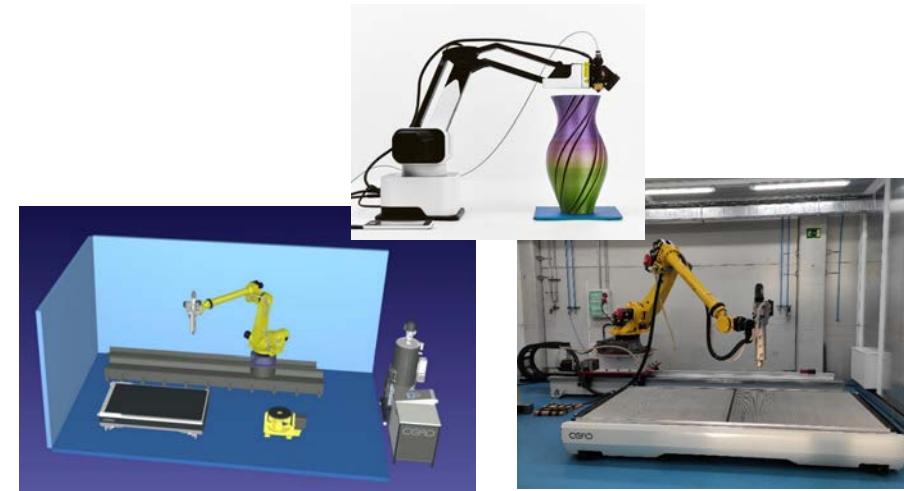

Zoom on INEDIT demo

at L'OCTROI Nancy

Zoom on INEDIT Use case 2

- A VR headset to show how to design the furniture in VR with AI
- The mini-robot to produce some of these designs with the wood material (1:10 scale replicas)
- Some real-sized items to display how the real products would look like: a large chair, a small stool and a small table.

Wed. 22nd June 9:00 – 12:30

Zoom on Open_Next

The future is open and community-based.

Today's industrial product creation is expensive, risky and unsustainable. But it doesn't have to be.

Presently, SMEs and maker communities across Europe are coming together to fundamentally change the way we create, produce, and distribute products.

We're establishing new collaborations between companies and consumers, focusing on eco-friendly mobility, consumer electronics and built-to-order furniture.

OPENNEXT seeks to empower both companies and consumers to co-design and co-manufacture products based on new mindsets, new business models, and new collaborative software solutions.

Wed. 22nd June 9:00 – 12:30

Zoom on iProduce

The iPRODUCE project aims to boost collaborative production by mobilising manufacturers, makers and consumers towards open innovation and the co-creation of consumer goods.

The project takes well-proven concepts and approaches (from makerspaces, fab labs and DIY manufacturing) and will upscale them through innovative digital tools and services that integrate a Social Manufacturing Framework (SMF).

These will be integrated and validated in well-connected multi-stakeholder ecosystems under the umbrella concept of collaborative Manufacturing Demonstration Facilities (cMDF).

Wed. 22nd June 14:00 – 18:00 – Octroi Nancy

Zoom on iProduce demo

at L'OCTROI Nancy

Wed. 22nd June 9:00 – 12:00

Zoom on DIY4U

DIY4U focuses on digitalizing and transforming European industries and services involved in the formulation, production and supply of particulate and liquid based Fast-Moving Consumer Goods (FMCG), enhancing the innovation capacity and competitiveness through decentralized customer-centric production approaches, by promoting the adoption of Open Innovation (OI) digital platform for collaborative production engineering and Fablabs (digitally enabled small-scale manufacturing machines/factories).

Wed. 22nd June 14:00 – 18:00 – Octroi Nancy

Zoom on DIY4U demo

at L'OCTROI
Nancy

DIY4U brings together a leading global Fast-Moving Consumer Goods (FMCG) Company, expert Small-to-Medium Enterprises (SMEs) from across Europe and supporting Industry Innovation and Research & Technology Organisations (RTOs). Together, we will build an open innovation digital platform integrated into 2 small-scale automated manufacturing machines (Fablabs), for you to create and make customised FMCG.

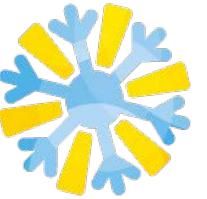

This project will develop new digital services and end-to-end solutions to enable real-time design (either locally or remotely via web-based portals) and delivery of your customised FMCG product. The project is supported by external industry stakeholders, who also want to use our technologies and services

Our Offering

The Open Innovation digital platform will be a highly visible and transparent means of bringing together supply-chain stakeholders and consumers, enabling you to seamlessly collaborate on the efficient creation of new powder and/or liquid FMCG. Integrated digital tools will be used in conjunction with product and process information from ingredient suppliers and equipment manufacturers, to digitally design new, high performance customised products, which can then be made on the automated Fablabs.

Thursday 23rd June 9:00 - 12:00 - Octroi Nancy
